

**The Valley Hospital
Physician Meet and Greet**

Some questions which may provoke discussion:

What do you really like about Valley? What do we do well?

At your previous hospital, what are some of the things that you saw already in place that you feel could make us better?

In order for this to be your hospital of choice for all of your patients, please tell me one or two things that would make Valley a better place for you to practice medicine.

Is there anything here that you are uncomfortable with, something that would make you consider using another hospital?

What is the single biggest issue facing your practice?

What can we do to make you feel more connected to Valley?

What is the best way for us to communicate to you?
